

## ENVIRONMENTAL POLICY

**GRUPO SEGURA**, aware of the need for conservation and protection of the environment, assumes the commitment to prevent and minimize environmental impacts arising from its activities of stamping, welding and metal parts assembly for the automotive sector.

Management is committed to aligning environmental management, quality management, and prevention of occupational hazards, as well as the organization's strategies, establishing environmental goals and objectives, assigning responsibilities, resources and deadlines, always based on continuous improvement and sustainable development, thus reducing the environmental impact of our activities.

Our commitment, the base of this environmental policy, aims to:

- Comply with applicable environmental legislation and regulations, and with other requirements derived from the needs and expectations of our stakeholders.
- Prevent pollution by using the most appropriate technology in order to reduce, as far as possible, discharges and emissions; likewise, prevent the generation, and ensure the recovery of waste, and preserve the consumption of natural resources.
- Train and sensitize employees/suppliers/customers in order to promote their environmental commitment.
- Exercise a positive, responsible and honest attitude towards the community and promote collaboration with all stakeholders, making use of the material and human resources at our disposal.
- Promote and allocate resources for the efficient use of electricity consumption, in an environment of sustainable development and reduction of emissions of greenhouse gases and other pollutants.

Management extends this commitment to all employees and all those who carry out any activity in, or for GRUPO SEGURA, so that they keep in mind all the environmental requirements and comply with the guidelines of this policy; this will be periodically reviewed to ensure that always are appropriate to the nature, magnitude and environmental impacts of the activities, products and services offered by this organization.
